PROFESSIONAL SUMMARY

B.Tech. AIML graduate and hands-on Python developer with experience building practical AI and backend applications using FastAPI, Flask, PyTorch, scikit-learn, and Docker. I enjoy understanding how systems work end-to-end, from APIs and data pipelines to application infrastructure and deployment. I learn unfamiliar technologies quickly by combining official documentation, experimentation, and AI-assisted development, and have explored areas including CI/CD, Bash, RAG, LLM applications, NLP, and cloud/serverless platforms. Through academic and personal projects, I have built and deployed working applications while continuously expanding my technical skills. Seeking an entry-level AI/ML Engineer or Python Backend Developer role where I can learn, contribute, and grow as an engineer.

CORE COMPETENCIES

- AI/ML Pipeline Engineering & Model Serving
- DevOps Infra, Containerization & CI/CD
- Backend System Architecture & Asynchronous API
- LLM Orchestration, RAG Systems & Intelligent Agents
- Web Scraping and Data Analysis
- Workflow Automation and System Optimization

TOOLS & FRAMEWORKS

- **Backend & Databases:** Python, FastAPI, Flask, PostgreSQL, SQLite, NeonDB, REST APIs, JSON
- **AI, ML & LLM Ecosystem:** PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib, Hugging Face, Ollama, Gemini API, Groq API
- **DevOps, Cloud & Infrastructure:** Docker, Linux, Nginx, Git, GitHub Actions, Cloudflare, Vercel, Azure, Jupyter/Colab

PROJECTS

Placify | AI CAREER ASSISTANT | PYTHON, FASTAPI, GEMINI API, SCIKIT-LEARN, POSTGRESQL | *Major Project* **Dec. 2025**

- Built "Placify" website, an AI-driven placement platform using FastAPI that parses PDF resumes to generate real-time readiness scores, skill gap analysis, and personalized improvement roadmaps via Google Gemini or Groq API.
- Engineered a hybrid Structured RAG matching system in Python to pre-rank employer fit locally, leveraging the LLM to synthesize deep-dive candidate profiles and automated cold email drafts for top matches.

Social Pulse | AI SENTIMENT ANALYSIS | PYTHON, FLASK, VADERSENTIMENT, PANDAS, INSTALOADER | *Minor Project* **Aug. 2025**

- Built a web application that scrapes and quantifies unstructured Instagram feedback into actionable Positive, Negative, and Neutral metrics using a custom-optimized VADER model tuned for modern slang and emojis.
- Engineered a Flask and Python backend with lazy-loaded scraping modules (Instaloader) and dynamic session management to ensure high-performance, error-free data extraction.

Portfolio | WITH PERSONAL AI CHAT-BOT | HTML5, CSS3, VANILLA JS, GITHUB PAGES, CLOUDFLARE | *Personal Project* **Jan. 2026**

- Built a static portfolio hosted on GitHub Pages with an AI chatbot powered by Cloudflare Workers and Google Gemini API. Used Cloudflare KV for context storage and enforced strict CORS policies to handle low-latency Q&A without running dedicated servers.

EDUCATION

Rajiv Gandhi Proudhyogiki Vishwavidyalaya (R.G.P.V) | Bhopal, MP, India

• B.Tech. in Computer Science, Artificial Intelligence and Machine Learning | CGPA: 6.11 **June 2026**

Topic Covered: Artificial Intelligence, Machine Learning, Deep learning, Computer Vision, NLP and Pattern Recognition.

• Polytechnic Diploma Degree in Mechanical Engineering | CGPA: 7.84 **Dec. 2022**

Topic Covered: CNC, AutoCAD, Manufacturing Process, Industrial and Automobile Engineering.

CERTIFICATION & BADGES

- [Python | HackerRank](#) | Jan. 2026
- [GitHub Foundation | Datacamp](#) | July. 2026
- [Docker Essentials | IBM, Cognitive Class](#) | July. 2026
- [Linux Unhatched | Cisco Networking Academy](#) | Jan. 2026
- [PyTorch Bootcamp | OpenCV Uni.](#) | Jan. 2026
- [Pandas | Kaggle](#) | Jan. 2026
